

## How to make an Icarus Flyer

1. Fold a piece of A4 size paper in half lengthwise, and then unfold.

2. Fold the top two corners down so they meet the centre crease.

3. Turn the plane over.

4. Fold the corners in again to the centre crease. You want the diagonal line coming off the top of the plane (on the left side) to be lined up with the middle (like on the right side).

5. Fold the top point down so that the tip meets the bottom of where the previous folds come together.

6. Fold the entire plane in half, in on itself.

7. Fold the wings down so that you're making a straight line across from the top of the snub nose. Repeat on the other side.

8. Decorate with the figure of Icarus underneath, and his wings above.

Icarus flies better when thrown at lower speeds - give it a gentle throw to get it further.
