Roman days, months, years and time

Can you match the words below up with their correct definitions?
The first one has been done to show you how.

chronology
an account of the order things happened, from the Greek 'chronos' meaning 'time'

orient
the east, from the Latin 'oriens' meaning 'rising' because the sun rises in the east

axis
an imaginary line through the middle of something

Janus/Ianus
the two-headed Roman god who gives his name to the month of January

centenarian
someone who has reached 100 years of age

post meridiem
after midday

equinox
when the day and night are the same length, from the Latin 'aequus' ('equal') and 'nox' (night)

ante meridiem
before midday

crepuscular
happening at twilight, from the Latin 'crepusculum' ('twilight')

mardi
the French for Tuesday, derived from the Latin 'Martis dies' ('day of Mars')

gnomon
the part of a sundial that casts the shadow

jueves
the Spanish for Thursday, derived from the Latin 'Iovis dies' ('day of Jupiter')

---

after midday

an account of the order things happened, from the Greek 'chronos' meaning 'time'
